

Project Design Phase-II Data Flow Diagram & User Stories

Date	03-10-2026	31 January 2025
Team ID	6ab75bec02319e850fce1837	
Project Name	Import Data using Transform Maps (Spreadsheet)	
Maximum Marks	4 Marks	

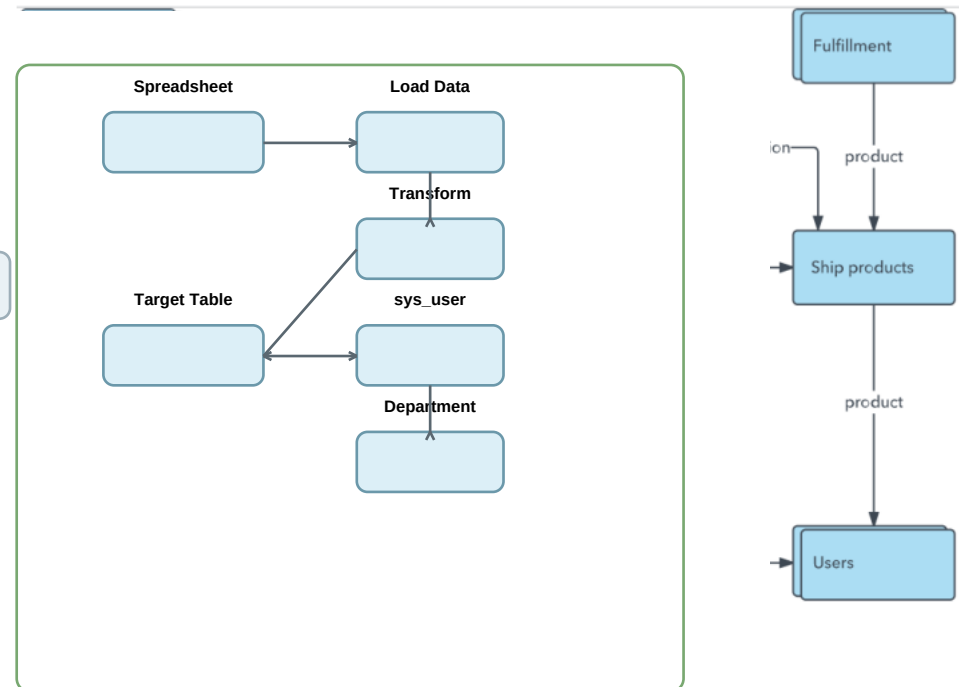

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: [\(Simplified\)](#)

Example: DFD Level 0 (Industry Standard)

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Administrator	Data Import	USN-1	As an administrator, I can upload the XLSX employee training spreadsheet through System Import Sets.	The file loads with Training Name, Completion Date, Status and Employee.	High	Sprint-1
Administrator	Transform Mapping	USN-2	As an administrator, I can create a Transform Map and map spreadsheet fields to the Employee Training table.	All required fields are mapped and the transform completes successfully.	High	Sprint-1
Administrator	Employee Reference	USN-3	As an administrator, I can link each training record to an employee using the sys_user reference.	The Employee field resolves to the correct user record.	High	Sprint-1
Administrator	Dot-Walking	USN-4	As an administrator, I can access the employee Department through dot-walking.	Department information is available in the list view.	Medium	Sprint-1
HR Manager	Access Control	USN-5	As an HR Manager, I can view and edit Employee Training Records.	Read and Write ACLs allow the assigned role to access records.	High	Sprint-2
Administrator	Impersonation Testing	USN-6	As an administrator, I can impersonate users to verify access permissions.	Authorized user can see/edit records; other users cannot see the table.	High	Sprint-2
Administrator	Application Module	USN-7	As an administrator, I can configure the Employee Training application menu and module.	The required module is available to authorized users.	Medium	Sprint-2

Project focus: Import spreadsheet data accurately, link employees, expose Department through dot-walking, and enforce role-based ACL access using impersonation tests.
