

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	03-10-2026
Team ID	6ab75bec02319e850fce1837
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Employee Training Data Import	Create an XLSX spreadsheet with Training Name, Completion Date, Status and Employee; load it through System Import Sets.
FR-2	Transform Map Field Mapping	Create a Transform Map, map the spreadsheet fields to the Employee Training table, and run Transform.
FR-3	Employee Reference & Dot-Walking	Reference the sys_user table through Employee and dot-walk to access the employee Department for reporting.
FR-4	Role-Based Access Control	Create the HR Manager role, assign it to the authorized user, and configure Read/Write ACLs.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Provide a clear ServiceNow interface for importing, viewing and managing employee training records.
NFR-2	Security	Protect Employee Training Records using the HR Manager role, ACL Read/Write controls, and impersonation testing.
NFR-3	Reliability	Ensure records are consistently imported through defined Import Set and Transform Map field mappings.
NFR-4	Performance	Use platform-native field mapping and processing for efficient employee training record imports.
NFR-5	Availability	Provide web access to Employee Training Records through the ServiceNow platform for authorized users.
NFR-6	Scalability	Support additional training records and employee details through the reusable table and Transform Map design.
